Senior-TV is a project co-funded by the Ambient Assisted Living program of the European Union running from the 1st of November 2015 to the 1st of November 2018.

SENIOR-TV aims at developing a widespread access, adaptable platform, installed on TV, smartphones and tablets able to provide seniors living in their own homes with a set of social and health services that will facilitate their self-care services, improve their access to formal and informal caregiving services and enhance their family and community insertion.

5 COUNTRIES

8 PARTNERS

36 MONTHS

Specific Objectives

1. To use Smart TV in combination with Smartphones and tablets, as main interfaces and to use other secondary peripherals for certain services.
2. To design formal and informal caregiving services targeted at older adults that live at their own home.

Target Users

The target group are older adults who are already retired, older than 60 years of age in some countries of the European Union, but most commonly older than 65 years of age, living with their partner or alone. Through all the project phases (tests and pilots) approximately 300 unique end-users will be involved.

Partners

The SENIOR-TV project is coordinated by the Cyprus Neuroscience & Technology Institute (CNTI), (Cyprus) with partners the IMATIA Innovation (Spain), Gluk Advice (Netherlands), Compexin SA - CPX (Romania), (Dom upokojencev Nova Gorica - DUNG (Slovenia), Development Centre of Information and Communication Technologies Savinja •alec, Ltd – RC-IKTS (Slovenia), Ana Aslan Foundation – ANA (Romania) and Strovolos Muncial Multi-Functional Foundation - SMMFF (Cyprus).
